

## Compression spring hybrid - heavy tension

### (CNT4HB)

#### ES-CNT4HB

This compression spring hybrid tensioner combines a compression spring and a tensioner all in one. The compression spring will maintain the tension of the fence wire and the ratchet tensioner can be used to increase the tension as and when required over time.

#### Features:

- Heavy duty durable design
- Combination of a compression spring and tensioner
- Hardy glass filled nylon body and spindle
- Plastic inner which eliminates galvanic reaction
- Stainless steel spring for long life 15kg tension
- Wire diameters from 1.6mm to 2.5mm
- Effortless tensioning using a half-inch ratchet
- Strain gauge at point of tension
- Increased ratchet tooth count for precision strain adjustment

#### Specifications:

Material: Stainless steel and UV stabilised glass filled nylon

Glass filled nylon spindle

Spring tension maximum: 15kg

Operating temperature: -40 to 80 Celsius

Operating voltage: 0- 12KV

Recycling: SPI resin code 7
