

Double pole lightning protection

EA-LIDII

Double pole lightning protection system inhibits lightning and diverts the voltage spikes caused by lightning. Can protect the output and also the return of a security energizer.

Features:

- Built-in lightning inhibitor, inhibits lightning from getting to the energizer.
- Built-in lightning diverter, diverts the lightning from the energizer into the earth spikes
- External cover and stainless steel components for use outdoors near the fence

Specifications:

Material: UV stabilised plastic housing Stainless steel components for long life
