

Solid aluminium alloy wire

Nemtek aluminium wire has the lowest resistance allowing long fences to be powered up, reducing the number of energizers needed.

Features:

- Low electrical resistance allows for longer fences to be powered by an energizer
- Good corrosion resistance for most environments (+5 km from coastline)

Specifications:

Material: Solid Aluminium alloy

Tensile breaking strength:

1.6mm: 60~70kgs

2.0mm: 90~100kgs

2.5mm: 170~185kgs

Elongation:10~11%

Resistance:

1,6mm 27Ohms/km

2.0mm 14Ohms/km

2.5mm 9Ohms/km
